MEMORANDUM FOR: Chief, Programs Division, ORR

25X1A ATTENTION : [REDACTED]  
THROUGH : Chief, Requirements Branch, Reconnaissance Group, CGS  
FROM : Chief, Photographic Intelligence Division, CIA  
SUBJECT : New Building at Kuybyshev Airframe Plant No. 1 and  
Complex J, TTMR  
REFERENCES : (1) ORR Requirement No. C-RR4-82,087  
(2) CIA/PID Project No. C 1842/64

1. This memorandum is in answer to the above referenced requirement which requested mensurations, perspective drawing of a new building at Kuybyshev Airframe Plant No. 1 and comparison of the characteristics of this building with the one under construction at Complex J, Tyura Tam Missile Test Range.

2. Construction of the large single bay building, 1025 by 175 feet began in the [REDACTED] and was in a late stage of construction in [REDACTED]. At that time the two end sections and the center section measured 400 by 175, 265 by 175 and 360 by 175 feet, respectively. The end sections, one with roof not finished and the raised center section were approximately 90 and 150 feet high. Construction had not begun on the building at Complex J, TTMR in [REDACTED] but the ground scars for footings were evident on [REDACTED] photography. When observed on [REDACTED] the majority of the vertical steel and horizontal roof support members had been erected and the roof was approximately 30, 50 and 55 percent complete on the two low bay sections on these dates. The overall dimensions of the building are approximately [REDACTED] and consist of 5 bays, approximately [REDACTED] and the Three of the bays are [REDACTED] and the other two are approximately 80-85 feet in height to the top of the horizontal roof support members. The height of the vertical steel columns for three of the bays is [REDACTED] and approximately 100 feet for the other two bays.

3. No changes in the rail network within or outside Kuybyshev Airframe Plant No. 1 were observed on [REDACTED] photography.
